a comprehensive examination of the fiction and poetry of raymond carver

tales of psychology consists of 19 short stories selected for their insight into human nature and their merit as fine works of literature each story is followed by a discussion of the psychological principles revealed reading this book will be a unique opportunity for lay readers and professional psychologists and writers alike to deepen their knowledge of human psychology tales of psychology demonstrates that artists can learn the psychological understructure of their characters from the insight of an experienced psychologist similarly the stories establish that lay people can absorb the teachings of these master writers in a captivating painless manner the conclusions reached in the stories beat out the findings of insightful psychology in a manner interesting to all from publisher s description

scientifically this is perhaps the most exciting of the four books how do beautiful creations come into being nature can make an infinite number of human faces each one unique each one beautiful the same is true for daffodils streams and stars but man made creations especially the towns and buildings of the 20th century have only occasionally been really good more often mediocre and in the last 50 years have most often been deadly what is the reason for the difference it hinges on the deep nature of the processes we use merely understanding the geometry of beautiful and living form the topic of book 1 is not enough to help us create such a living geometry in the 20th century our society was locked into deadly processes which created our current built environment process that most people were not really aware of and did not question despite their best efforts and intentions architects and planners working within these processes could not achieve a living built environment life and beauty in the built world arise only from processes which allow living structure to unfold the secret lies in knowing as nature does what must happen in what order what sequence of events allows a living form to unfold successfully here in book 2 alexander puts forward a fully developed theory of living process he defines conditions for a process to be living that is capable of generating living structure he shows how such processes work and how they may be created at the core of the new theory is the theory of structure preserving transformations this concept new in scientific thinking is based on the concept of wholeness defined in book 1 a structure preserving transformation is one which preserves extends and enhances the wholeness of a system structure preserving transformations provide the means for any step by step process social biological architectural or technical to reach configurations which are most profound most capable of supporting life the process of creation whether in the formation of a single object or in the piece meal aggregation of a town requires this sort of generative process a careful and deliberate sequence of steps in which each step creates the context for the next one and each next wholeness is derived from the previous wholeness our billions of beautiful and unique human faces come from one class of sequences driven by these sequences an initial cell differentiates again and again until beautiful and complex human beings emerge infinitely various

always harmonious making changes in society so that streets buildings rooms gardens and towns may be generated by hundreds of such sequences requires massive transformations this book is the first blueprint of those transformations

this four volume work allows the reader to form one picture of the world in which the perspectives from science beauty and grace and commonsense intuitions are interlaced

many of the authors robert clark discusses have yet to be recognized for their individual contributions to the emergence and continuing vitality of the movement school of images is organized based on chronology and lines of influence in the introduction clark offers a definition of the mode and then describes its early stages he then explores six works that reflect the core characteristics of the mode ernest hemingway s in our time raymond carver s cathedral susan minot s monkeys jay mcinerney s bright lights big city sandra cisneros s caramelo and cormac mccarthy s the road in the conclusion he discusses contemporary authors and filmmakers whose work represents the ongoing evolution of the category provided by publisher

raymond carver s personal story as a writer became publicly known through an unusually intense cooperation with his literary agent gordon lish carver s career can be viewed as the story of a fight for the control of his writerly voice in which he is doomed to fail due to the heterogeneity characterizing the genesis of his works the parallel versions of the same stories in the carver canon not only pose a threat to any attempt of a simplistic evaluation of his literary legacy but also raise questions about the authority of the writer the author of the present book considers the choices carver lish and other editors made part of the collective social act of manufacturing and attempts to carry out a neutral analysis of the various versions

contains war correspondence during 1877 1878 of members of the uk s daily news newspaper regarding the russo turkish war

this study combines a descriptive and theoretical presentation of kɔnni a gur language of northern ghana it presents an optimality theory analysis of the entire phonological system the descriptions are separated from the formal analyses in order to facilitate use by both descriptivists and theoreticians morphology is described including the noun class system reduplicative agentive nouns noun adjective complexes nominal derivations and various verbal aspectual suffixes major sections are included on consonants vowels and tone the volume also includes a brief syntax sketch co occurrence restrictions phoneme frequency counts measurements of segment durations and vowel formants and seven appendices of data selected notes of interest some phonology is limited to only certain noun classes the 9 vowel atr vowel system and diphthongization are
