this book addresses climate change and sustainability management from a transdisciplinary perspective which encompasses within itself how different humanistic disciplines can culminate with each other to move ahead with the agenda issues of adapting to climate change and sustainability management have been gaining global prominence over the past few

decades there have also been volumes of literature that highlight the technical dimensions of climate change and sustainability across regions and cultures however they have had limited strength to bring direct and desirable impact in promoting pro climate action and sustainability behaviour the major reason for this is limited inclusion of pluralistic perspectives into human cognition and affect and resultant limited public acceptability although behavioural science as a discipline has taken a front seat in promoting behavioural transformation the book argues that other humanistic fields of understanding like education art literature philosophy political science sociology economics etc have to be integrated in order to present a holistic standpoint to sustainability literature

this book and its companion volume offer a better understanding of the lessons that indian policymakers can learn from china s economic experience over the last 40 years the aim of the two books together is to evaluate china s incremental reforms and how these reforms have impacted on the chinese economy based on a classical rather than from a neoclassical perspective using a case study method in this second volume the author examines knowledge creation knowledge spillovers and entrepreneurship across both china and india the comparative study places the theoretical analysis of the previous volume in a real world context of how china s economic reforms since 1978 have actually impacted on the country its real world findings of the chinese economy present a complete perspective on china s lessons for india as well as at a global context
