the technology of video games has progressed a great deal since the creation of the first  
video game systems an example of an earlier video game would be pong in this game two  
players would control simple lines that could only go up or down on the screen these lines  
were controlled by paddles and the point of the game was to hit the bouncing ball and  
make your opponent miss it the video games of today are much more advanced than that  
they offer multiple genres of games that are sure to meet the interests of almost any  
person most of them can also be played online which offers an entire new experience in

video game testing is actually quite important in the development of a game some would  
argue that they are just as important as the programmers the main job of a game tester is  
to go through a game level by level scene by scene and make sure that everything is  
working correctly and that the game is functioning up to par you will need some  
knowledge in programming and you will need an eye that pays very close attention to  
detail in most cases the difference between a top seller and a game that does not do well
