language is the most essential medium of scientific activity many historians sociologists and science studies scholars have investigated scientific language for this reason but only few have examined those cases where language itself has become an object of scientific discussion over the centuries scientists have sought to control refine and engineer language for various epistemological communicative and nationalistic purposes this book seeks to explore cases in the history of science in which questions or concerns with language have bubbled to the surface in scientific discourse this opens a window into the particular ways in which scientists have conceived of and construed language as the central medium of their activity across different cultural contexts and places and the clashes and tensions that have manifested their many attempts to engineer it to both preserve and enrich its function the subject of language draws out many topics that have mostly been neglected in the history of science such as the connection between the emergence of national languages and the development of science within national settings and allows us to connect together historical episodes from many understudied cultural and linguistic venues such as eastern european and medieval hebrew science

the western classical tradition in linguistics examines ancient medieval post renaissance and modern conceptions of linguistics i e the study of

language and languages it identifies a classical tradition to which modern linguistics owes a very clear debt for example aristotle takes language to be a a symbolic system that represents b the world of our experience as it is contained within the mind he believed c the world is external to human beings who are all capable of d perceiving the same things within it finally e aristotle was only interested in form as a corollary of function a e have given rise to different developments in linguistics a is a premise for all linguists but has been developed perhaps to its limits in post fregean semantics from the last quarter of the 20th century b has been pursued by cognitive linguists c was taken up by the speculative grammarians of the late middle ages who looked to the structure of god s world as informing the structure of universal grammar the rationalists of the seventeenth and eighteenth centuries took up d revising the interpretation of their speculative precursors to seek universal grammar in the god given rational minds of the human beings perceiving the world around them chomsky reinterprets the rationalist doctrine to seek universal grammar in the human mind while eschewing the relevance of human perception of anything other than linguistic input functional linguistics has picked up on e so today s formal linguists cognitivists functionalists and chomskyites may often be at odds with each other but all tread in aristotle s footprints within the western classical tradition there have been times when linguists stepped outside of the tradition but they nearly always borrowed from
